

Results Table

Atomic Test	Wazuh Detection	AI Analysis	Human Verification	Final Verdict
T1016 – System Network Configuration Discovery	Detected suspicious command execution (Rule 92052, Level 4). Mapped to T1059.003 instead of T1016.	AI identified network discovery commands (ipconfig, netsh, arp, nbtstat, net config) and correctly inferred T1016 activity.	Verified that the commands were executed by Atomic Red Team in a controlled environment.	Benign (Lab Simulation)
T1083 – File and Directory Discovery	Detected suspicious command execution (Rule 92052, Level 4). Mapped to T1059.003 instead of T1083.	AI recognized extensive directory enumeration (dir, tree) and correctly classified the activity as File and Directory Discovery (T1083) .	Confirmed that the behavior originated from an authorized Atomic Red Team test.	Benign (Lab Simulation)
